

Disassembling Western Digital Essentials HD

Anti-vibration rubber pieces

Only prerequisite guide for disassembling Western Digital Essentials HD

Written By: Gaetan

Step 1 — Case

- Use a large plastic opening tool along the rear panel:
 - There are 4 clips to release.

Step 2

- Slide the cover along the plastic frame.

Step 3 — LED Light conducting plastic pieces

- Slide off the largest plastic pieces.

Step 4

- Bend the second small plastic piece to release it from the rubber piece.
- Now you can slide it out.

Step 5 — Hard Drive

- Slide out the hard drive as shown in the picture

 *Make sure to slide as shown or you may damage the USB bridge logic board.*

Step 6 — Anti-Vibration Rubber Pieces

- Remove the 4 rubber piece from the plastic frame at each corner.

Step 7

- Remove the rubber piece from the SATA/USB bridge logic board.

To reassemble your device, follow these instructions in reverse order.
